HTML, CSS, JavaScript, Typescript, ReactJS, NextJS, NodeJS, Svelte, Jira, Bitbucket, Git, Google Cloud Platform, Docker, MongoDB, Styled Components

Professional Experience

● **Associate Software Engineer**

R/GA   Mar 2022 - Present

- Chat Bot:
  - Developed and maintained a chat bot using NextJS, TypeScript, CSS, and Tailwind, resulting in improved user engagement and satisfaction.
- Internal Slack Bot Integrated with GPT Assistant:
  - Engineered and integrated an internal Slack bot leveraging MongoDB, Node.js, Slack API, and GPT API, enhancing team communication and productivity.
- Internal Data Platform:
  - Contributed to the frontend development efforts for an internal data platform utilizing JavaScript, ReactJS, and Material-UI, facilitating data-driven decision-making processes.

● **Data Architect Intern**

Globant   Sep 2021 - Mar 2022

I completed a Data Architect Trainee program, where I engaged in comprehensive training covering the following topics:

- Linux
- Python Programming
- Data Modeling & Cloud Technologies
- Hadoop Ecosystem
- Apache Spark

The program included both theoretical instruction and practical exercises. Additionally, I participated in oral examinations, responding to questions assessing theoretical knowledge.
